# The vision of Gutenberg

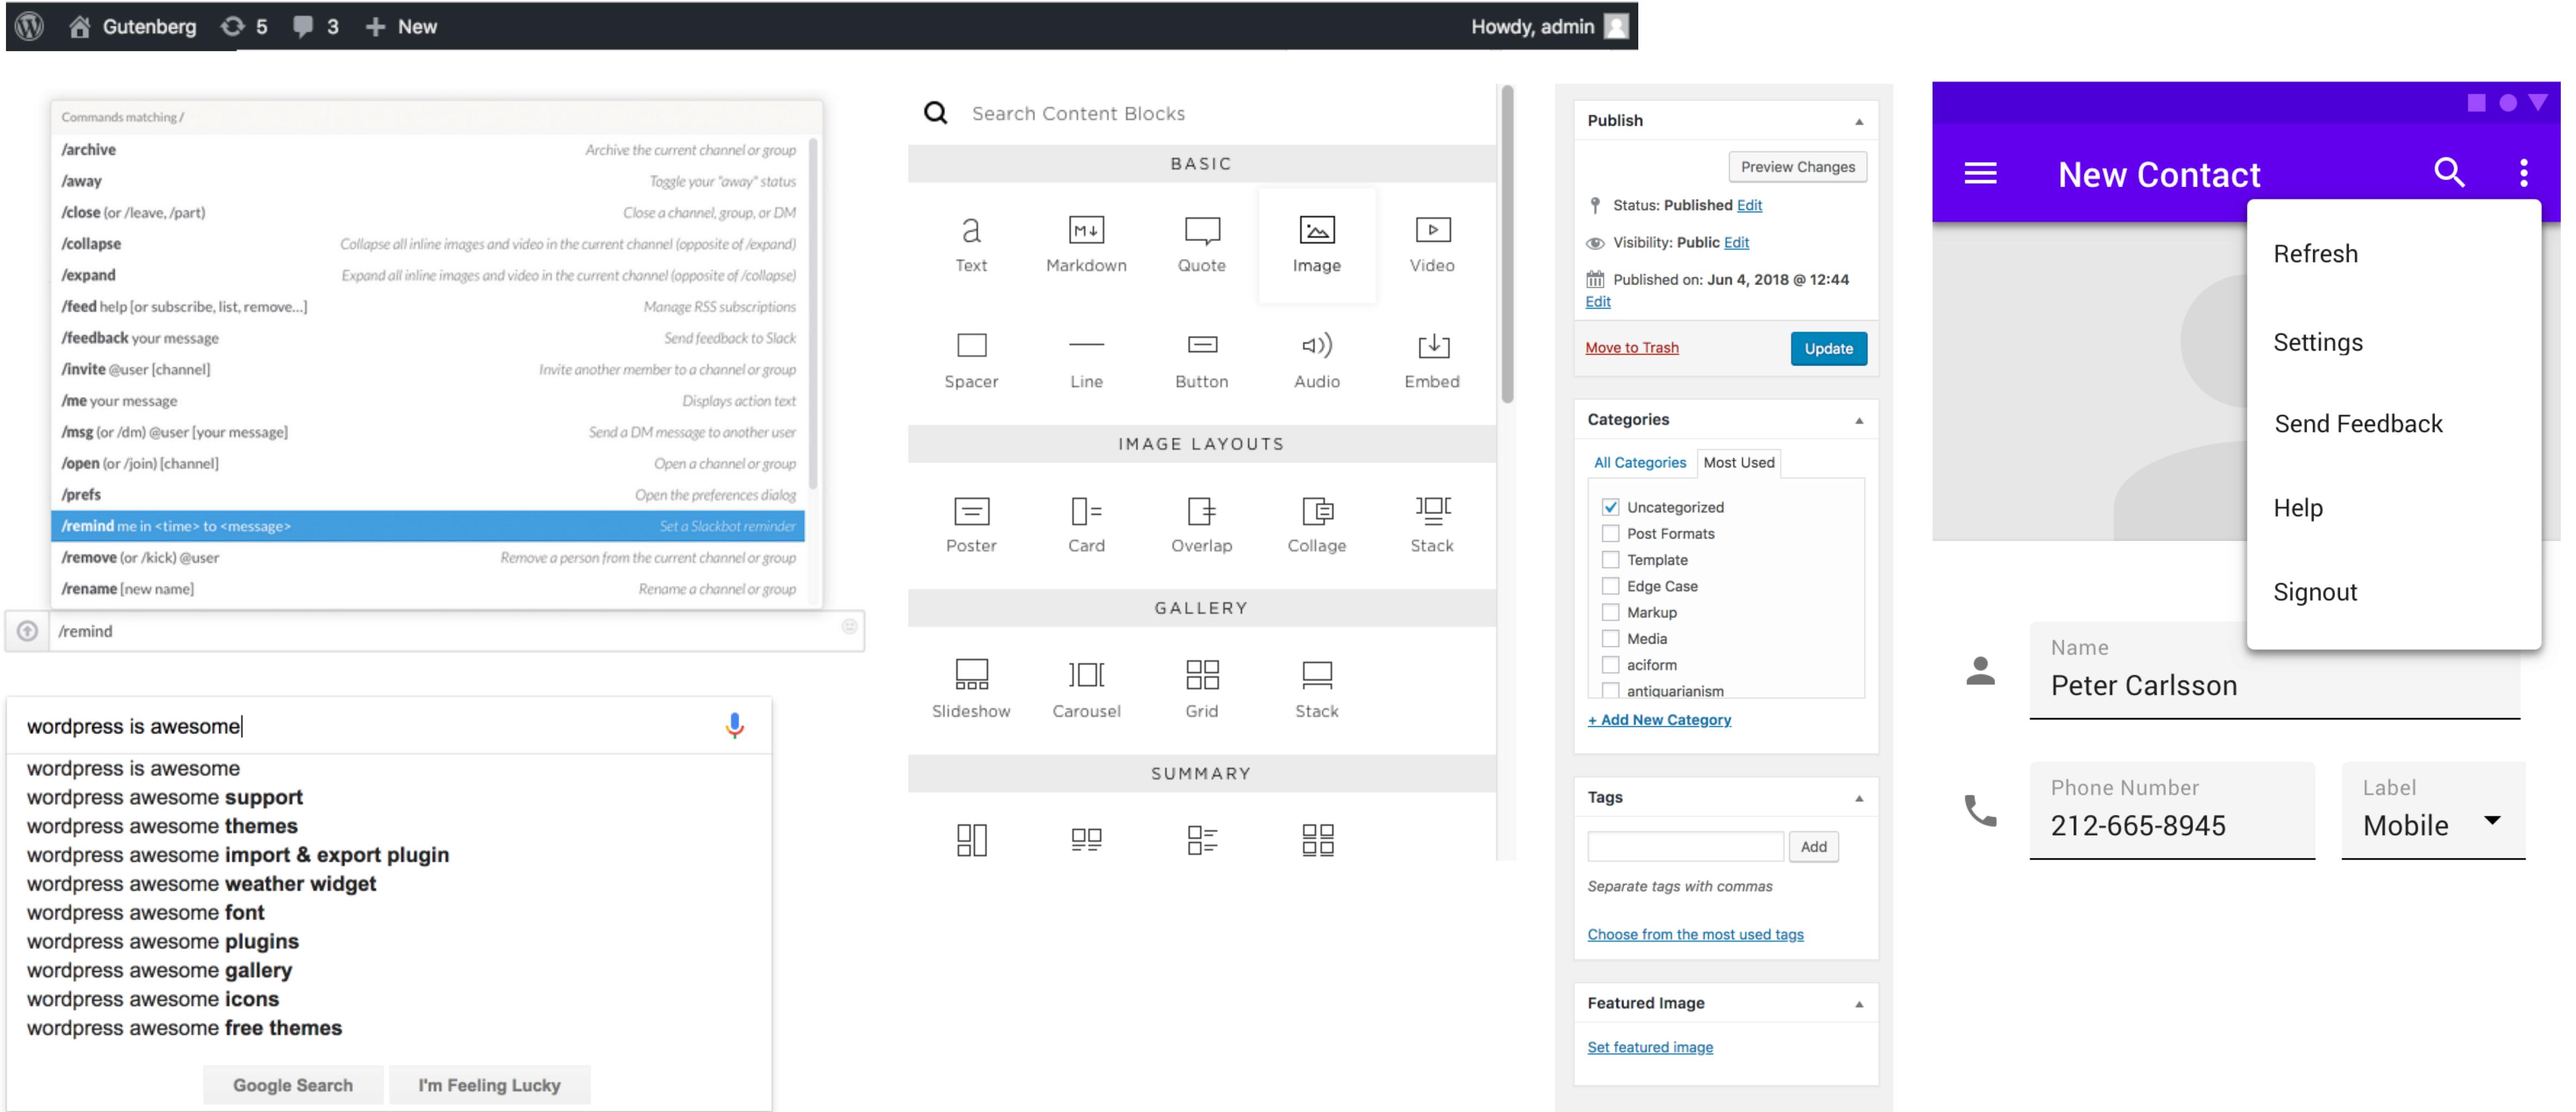

Everything is a block. Text, images, galleries, widgets, shortcodes, and even chunks of custom HTML, no matter if it's added by plugins or otherwise.

[wordpress.org/gutenberg/handbook/reference/design-principles](https://wordpress.org/gutenberg/handbook/reference/design-principles)

You should only have to learn how the block works,  
and then know how to do everything.

This screenshot shows the WordPress dashboard with the Gutenberg editor active. The left sidebar is dark-themed and includes links for Dashboard, Posts (selected), All Posts, Add New, Categories, Tags, Media, Pages, Comments (with 3 notifications), Appearance, Plugins (with 2 notifications), Users, Tools, Settings, Gutenberg, and a Collapse menu. The main area has a light background. At the top, it says "Add title" and "Write your story". Below that are three small icons: a video camera, a header icon, and a list icon. At the very top right, there are buttons for "Preview", "Publish...", "⚙️", and a more options menu. The top bar also shows the user "Howdy, admin" and the current page "Gutenberg".

0/4

# Anatomy of blocks

4/1

## Block Toolbar

---

The image shows a Microsoft Word document window. A block of text is selected, indicated by a light gray background. Above this block is a toolbar containing various icons: a bold button (B), an italic button (I), a font size dropdown (Aa), a font color dropdown (A), a font style dropdown (A), and a link icon (link symbol).

There's the room you can see through the glass; it's just the same as our living-room here, only the things go the other way. I can see all of it—all but the bit just behind the fireplace. Oh! I do wish I could see that bit! I want so much to know if they've a fire there. You never can tell, you know, unless our fire smokes. Then smoke comes up in that room too—but that may be just to make it look as if they had a fire—just to pretend they had. The books are something like our books, only the words go the wrong way. Won't there ever be any way of our getting through, uncle?

The block toolbar can be above the block

---

The screenshot shows a rich text editor interface. At the top, there's a toolbar with icons for bold, italic, underline, and other styling options. Below this is a larger text area containing a paragraph of text. To the right of the text area, a vertical sidebar is open, showing settings like 'Visual Editor' (which is checked), 'Code Editor' (with a keyboard shortcut of  $\text{⌘}+\text{Shift}+\text{Alt}+\text{M}$ ), 'Settings', and 'Tools'. At the very top of the screen, there are status indicators ('✓ Saved'), a 'Preview' button, a 'Publish...' button, a gear icon for settings, and a three-dot menu icon.

There's the room you can see through the glass; it's just the same as our living-room here, only the things go the other way. I can see all of it—all but the bit just behind the fireplace. Oh! I do wish I could see that bit! I want so much to know if they've a fire there. You never can tell, you know, unless our fire smokes. # Hints

Keep icons simple and signify the block

---

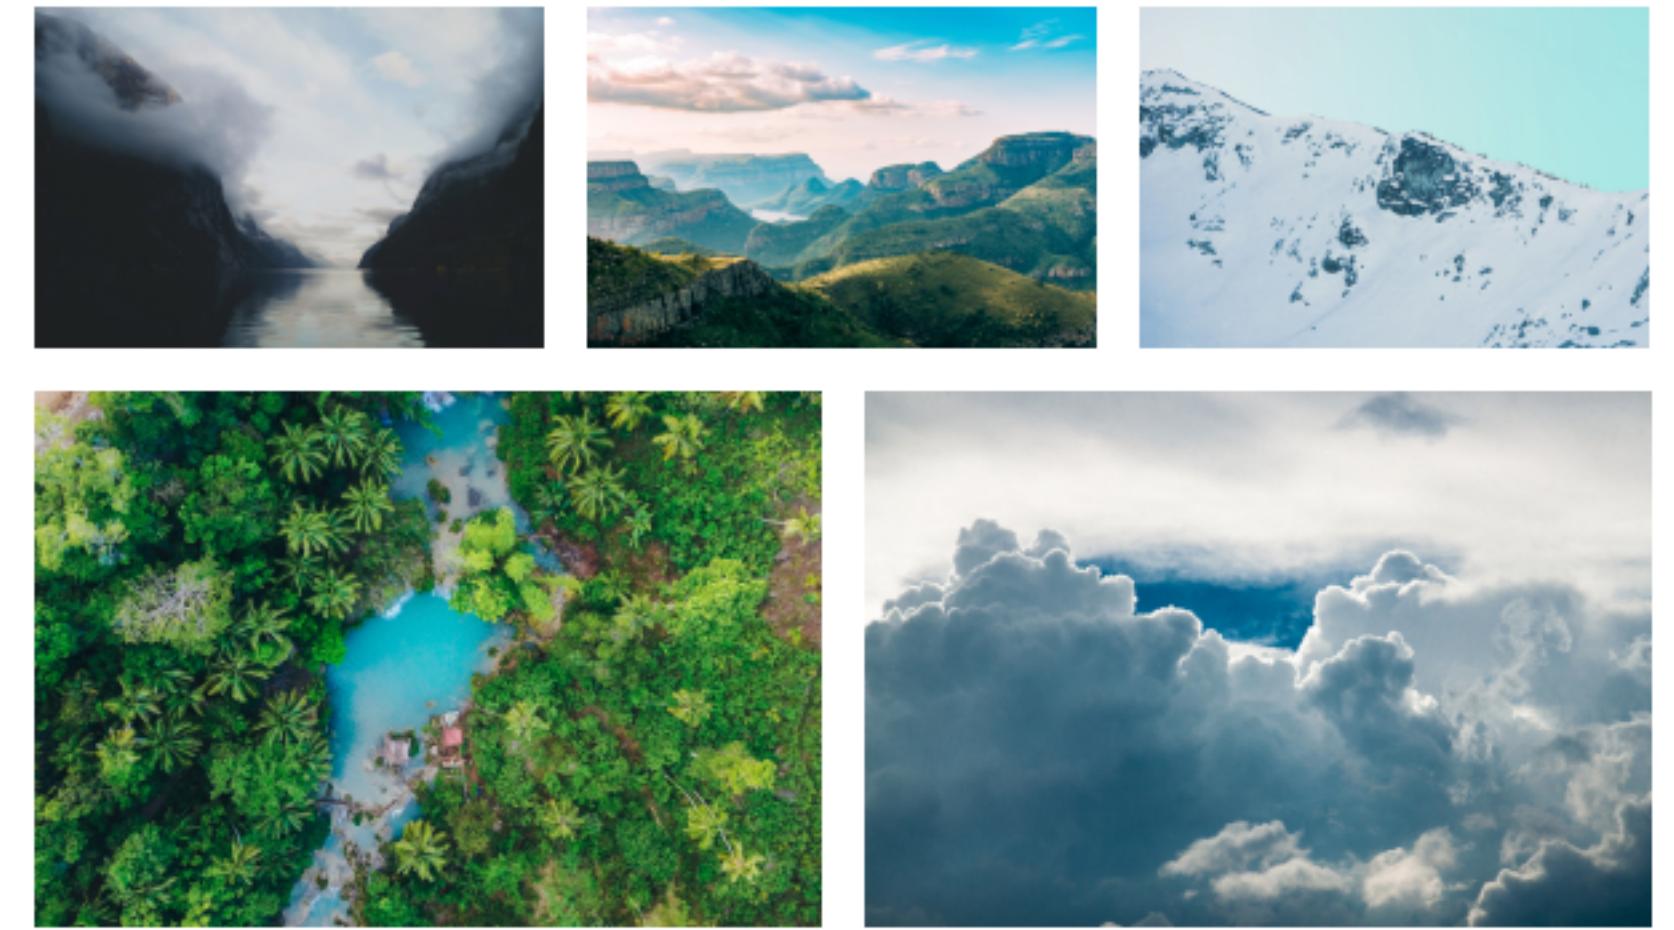

Add text...

| Write quote...

Have good placeholder defaults, think of a page made up

---

When unselected show a preview of block

---

## Cover Image

Add a full-width image, and layer text over it -- great for headers.

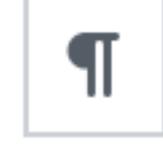

## Heading

Insert a headline above your post or page content.

## Quote

Maybe someone else said it better  
-- add some quoted text.

## Paragraph

Add some basic text.

# Every block at a minimum should have a description of what it is

---

0/7

# Thoughts

7/1

## Blocks should adapt

---

Think what your block feels/looks like on all devices

7/2

## Where should blocks live?

---

... it depends but likely plugins

7/3

## Direct manipulation

---

Direct manipulation is an interaction style in which the objects of interest in the UI are visible and can be acted upon via physical, reversible, incremental actions that receive immediate feedback.

[www.nngroup.com/articles/direct-manipulation/](http://www.nngroup.com/articles/direct-manipulation/)

# Alice....

The screenshot shows a WYSIWYG editor interface with a "Block" tab selected. A "Gallery" block is active, displaying five images in a 2x3 grid. The top row contains a fjord, a mountain range, and a snowy mountain. The bottom row contains a tropical landscape and clouds, with a placeholder for another image. The sidebar on the right provides settings for the gallery: "Columns" set to 3, "Crop Images" turned on, and "Link to" set to "None".

There's the room you can see through the glass; it's just the same as our living-room here, only the things go the other way. I can see all of it—all but the bit just behind the fireplace. Oh! I do wish I could see that bit! I want so much to know if they've a fire there. You never can tell, you know, unless our fire smokes. Then smoke comes up in that room too—but that may be just to make it look as if they had a fire—just to pretend they had. The books are something like our books, only the words go the wrong way. Won't there ever be any way of our getting through, uncle?

Everything with blocks is direct manipulation and should be

## Potential ideas

The screenshot shows two versions of the same Latin text in the Gutenberg editor. The left version has a tooltip for a long sentence, while the right version has a sidebar with readability analysis options.

**Left Side (Tooltip Example):**

## Sea id autem nominavi deseruisse

...sumo aliquam has. Eum aperiam interpretaris at, sea et  
recusabo expetenda, omnis tibique mea no. Pri suas partem ea, ius sonet  
numquam offendit cu, ad simul admodum pri. Eum cu unum choro  
albucius.

This sentence is too long.  
Consider shortening it.

**Right Side (Sidebar Example):**

## Sea id autem nominavi deseruisse

...sumo aliquam has. Eum aperiam interpretaris at, sea et  
recusabo expetenda, omnis tibique mea no. Pri suas partem ea, ius sonet  
numquam offendit cu, ad simul admodum pri. Eum cu unum choro  
albucius.

The sidebar includes:

- Editor
- ✓ Visual Editor
- HTML Editor
- Plugins
  - Check Spelling Alt+Shift+n
  - Analyze Readability** (selected)
  - Collaborate Alt+Shift+e
  - WolframAlpha
  - Publicize
- Help Alt+Shift+h

## Readability

The screenshot shows the Gutenberg editor interface. On the left, there's a rich text editor with a toolbar for bold, italic, and other styling options. Below it is a list block containing two items, each with a timestamp (joen and gziolo) and some Latin text. To the right of the editor is a sidebar with various settings and a preview area.

## Collaborative editing

[github.com/WordPress/gutenberg/issues/1930](https://github.com/WordPress/gutenberg/issues/1930)

The screenshot shows the Gutenberg editor interface. At the top, there's a toolbar with various icons for document operations like saving, previewing, and publishing. Below the toolbar, the main content area has a title "Title" and a rich text block containing placeholder text from "Lorem ipsum" to "consectetur adipiscing elit". A comment section is visible on the right, showing a conversation between users Tim and Anton. Tim's first comment suggests making the text bold for impact, and Anton responds with a suggestion for a background color. Tim then marks his comment as resolved. To the right of the text block, a "Block" palette is open, showing options for "Text" and "Text with icon". The "Text" tab is selected, displaying settings for font size (L, XL), a large initial letter (A), and color. The palette also includes a "Reset" button and a "More" button.

Tim  
5 minutes ago

I love this part! Maybe it should be bold for extra impact?

Anton  
2 minutes ago

Good idea. Maybe add a nice-looking background color too?

Tim  
Just now

Marked this comment as resolved.

Commenting : work in progress...

The screenshot shows a content editor interface with the following elements:

- Top Bar:** Includes standard navigation icons (back, forward, search, etc.) and a "Publish" button.
- Sidebar:** A vertical sidebar on the left contains a "Document" tab, a "Block" tab, and a "Status & Visibility" section. In the "Status & Visibility" section, "Visibility" is set to "Public", "Publish" is set to "November 24, 2017 10:07 am", "Post Format" is "Standard", "Stick to the Front Page" is off, "Pending Review" is off, and the "Author" is "admin".
- Main Content Area:** The main area displays the title "Add title" and a placeholder "Write your story". Below this is a modal-like box with a message: "Add blocks of different types by clicking '+' to open the library." and a "See next" link.
- Right Panel:** A panel on the right shows a preview of the content with the text "vituperatoribus. Te brute dicunt sea, ut vis omnium menandri, ut sumo aliquam has. Eum aperiam interpretaris at, sea et recusabo expetenda, omnis tibique mea no. Pri suas partem ea, ius sonet numquam offendit cu, ad simul admodum pri. Eum cu unum choro albucius." and a visual representation of a grid of blocks.
