The vision of Gutenberg

Everything is a block. Text, images, galleries, widgets, shortcodes, and even chunks of custom HTML, no matter if it's added by plugins or otherwise.

wordpress.org/gutenberg/handbook/reference/design-principles

You should only have to learn how the block works, and
then know how to do everything.

The screenshot displays a rich text editor interface with two distinct configurations of the block toolbar.

Configuration 1 (Left): The toolbar is positioned above the text area. It includes standard editing icons: a bold button (B), an italic button (I), a font size dropdown (ABC), and a link icon (🔗).

Configuration 2 (Right): The toolbar is integrated directly into the top of the text area. It features a "Saved" status indicator, a "Preview" button, a "Publish..." button, a settings gear icon, and a three-dot menu icon.

Text Content: Both configurations display the same block of placeholder text:

The screenshot shows two versions of the same Latin text in the Gutenberg editor. The left version has a tooltip for a long sentence, while the right version has a sidebar with readability analysis options.

Left Side (Tooltip Example):

This sentence is too long.
Consider shortening it.

Right Side (Sidebar Example):
